

Informative ECG at the  
point of care.

The MAC\* i.

# The MAC i

is an affordable, accurate, portable electrocardiograph device that can be configured to your needs. Its reliability and portability help you provide ECG analysis<sup>†</sup> to patients when and where it's needed, even when space and battery-charging opportunities are limited. As your patients' first line of defense against disease, you may need this information to treat or refer.

<sup>†</sup>The MACi can be ordered with Marquette\* 12SL ECG measurement and interpretation as optional features.

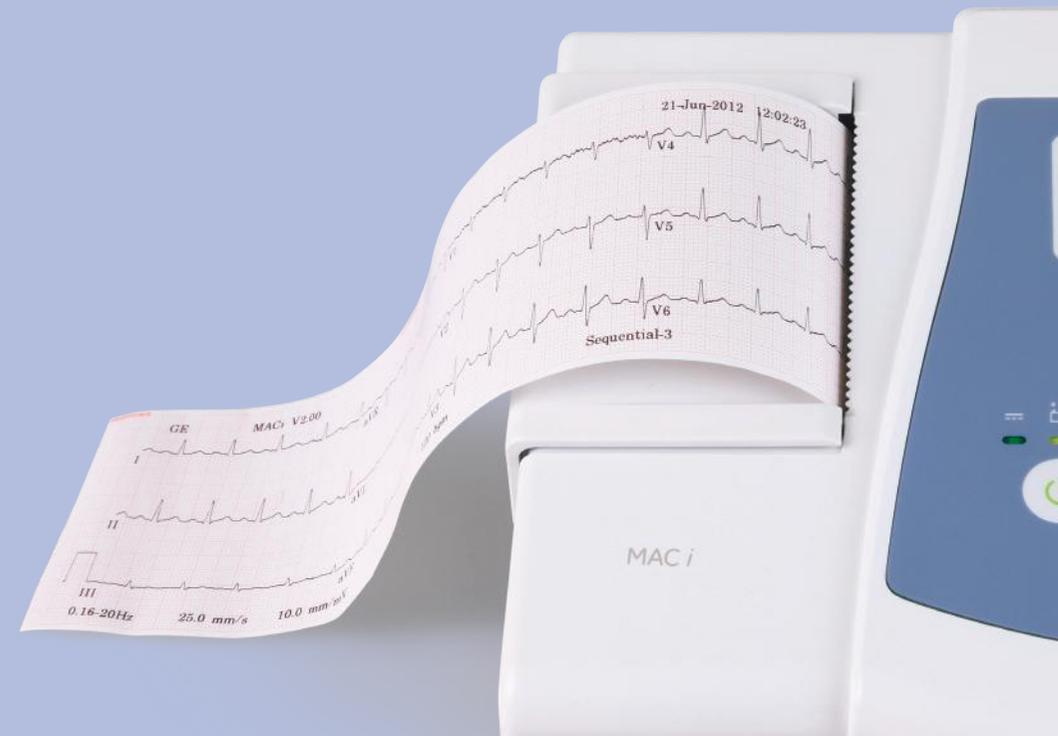

Intuitive,  
so you can focus on your patient.

Your practice is wide-ranging, and you see many patients and use many tools every day. That's why the MAC i is designed to function intuitively, simplifying training and operation.

**Alphanumeric display** visualizes ECG setup information.

**One touch** acquires, analyzes and prints data.

**Automatic and manual modes** serve different workflow needs.

## Inclusive, with everything you need to go.

The MAC i performs when and where you need it. Small and light—weighing less than 1.2 kg even when loaded with paper—it's easy to carry to the clinic or patient.

**Battery life** gives you at least 250 ECG reports on a single charge, when in continuous use. The MAC i can function on either mains or battery power.

**External power supply** helps to keep the unit lightweight.

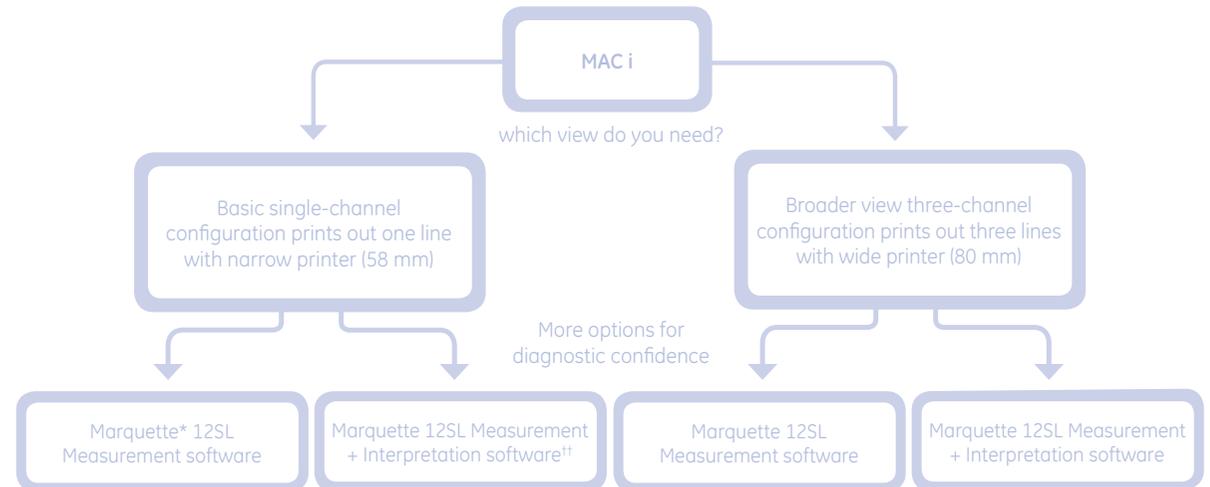

**Supplies and accessories**—GE Healthcare offers a wide range of tested and approved quality items designed to maintain the performance of the MAC i.

## Inspired flexibility, to configure to your needs.

Not all physicians have the same needs for an ECG device. Why pay for features you won't use? MAC i can be purchased in the configuration that best fits your needs.

### Six configurations:

## Intelligent, so you can be confident.

Patient care depends on reliable and proven clinical decision support. The MAC i provides the accuracy you need to diagnose or refer your patients.

**High standards of quality.** The Marquette 12SL algorithm is tested against multiple clinically correlated ECG databases to verify accuracy. It meets or exceeds all electrocardiograph standards of the International Electrotechnical Commission.

**Developed with customer input.** We listened to your needs and consulted some of the world's leading cardiologists to create the MAC i.

**More than 30 years of experience** in reliable ECG analysis and interpretation.

Availability of the MAC i and its supplies and accessories varies by country. Please contact your local GE Healthcare representative for more details. The MAC i is not available for sale in the United States or Canada.

\*\*Gender-specific and age-specific interpretation features are not included in the Marquette 12SL algorithm within the MAC i.
