Disposable Medical Devices

Product Catalogue GS-153
OUR MISSION..

To make a mark in our chosen area, by being ever abreast of new possibilities and tapping the market opportunities.

To anticipate the needs of our customers and end users translating their requirements into meaningful products.

To create, innovate and produce excellence through a philosophy of uncompromising dedication at every level of function.

To make the best use of resources and technology in our pursuit for continuous improvement in our product portfolio.

To nurture a lasting relationship with our distributors - our partners in growth, through empathic understanding and mutual respect.

To leverage our human resources by recognizing and rewarding talent, nurturing creativity, to create an ethos of perfectionism.
ABOUT US...

One of free India’s earliest, most critical revolutions took place in 1952 in the field of healthcare.

At a time when most patients were vulnerable and many succumbed to infections caused by re-usable medical devices, Romsons stepped forward with a pioneering breakthrough – the concept of disposable medical and surgical devices.

Today, over half a century later, the culture of disposable medical devices is well established and Romsons has entrenched itself as the prominent brand in the business – a pioneer and a leader.

An INR 4.50 billion, professionally-managed enterprise. A global player with presence in 60 countries. A retail footprint across geographies – with 1000 plus distributors in India and abroad. Most significantly, the name Romsons continues to inspire trust for unsurpassed quality, innovation and safety of its products.

ROMSONS GROUP OF COMPANIES :

- Romsons Scientific and Surgical Industries Pvt Ltd.
- Romsons International-100% Export Oriented Unit
- Romsons Juniors India
- Romsons Medicins
- Raj Vijay Corporation (Unit I & II)
- RGI Meditech Pvt. Ltd.

A PRODUCT FOR EVERY NEED? WELL ALMOST

We have the largest product portfolio in the industry (100 products in over 400 sizes), which caters to almost the entire spectrum of a patient’s need. Each product has been designed and manufactured to deliver maximum performance and safety. We have earned recognition in the form of award from The Chamber of Commerce in India for outstanding export performance and the special recognition instituted by Ministry of MSME, Government of India, our pioneering work has been universally appreciated.

WINNING THE TRUST OF THE BEST :

Our experience (over 59 years) in understanding a patient’s needs and a doctor’s requirements has earned us the loyalty of the most demanding customers in the world.

Our ability to serve the emerging needs of our customers with speed and agility makes us the preferred choice in the competitive market. Little surprise then, that Romsons products are being exported to developed and emerging markets in over 60 countries.

We also regularly participate in international medical trade fairs like Medica (Germany), Hospimedica (Singapore), Arab Health (UAE), FIME (USA) amongst others.

RESEARCH AND DEVELOPMENT :

A relentless quest : Our mission is to create products that promote healing, well-being and safety of patients. So, we are continuously improving existing products and researching new solutions in the light of changing customer needs and market dynamics. Our research and production teams work in tandem to realize the above objective.

GOOD MANUFACTURING PRACTICES :

Our manufacturing plant conforms to GMP, a WHO proprietary benchmark. The discipline of this standard is evident in the physical ambience of our plant, the air and water quality, manufacturing technology, packaging and the sterilization process.

Ambience : Special micro and HEPA filters at all air handling units ensure minimal contamination in all manufacturing areas. Micro-organism and particle concentration levels are carefully monitored by the micro-biological labs to keep these levels within safe limits. Employees undergo periodic medical checkup to maintain high standards of health and hygiene.

All clean rooms are provided with a three step changing room and air showers at the room entrance to ensure a complete dust-free environment.

MANUFACTURING PLANT :

We have taken great care to source up-to-the-minute, frontline technology. As a result we are able to process moulding and extrusion of components and tubings with precision and within close tolerance.

PACKAGING AND STERILIZATION :

Our products are packed on most modern packaging machines suitable for working in clean room conditions, to ensure minimal risk of contamination or damage during transportation. The superior assembly and packaging machines ensures consistency in product quality.

We use Ethylene Oxide to sterilize the products, as per EN 550/ ISO 11135 standard. The entire process is automated and computerized. Each batch is well documented for the sterilization cycle and released for dispatch after written approval of a senior Quality Assurance official.

TOWARDS ZERO DEFECT QUALITY :

Our goal is to manufacture zero-defect products. We have meticulously planned and built a series of multiple online and manual quality control measures into each stage of raw material procurement, manufacturing and packing cycle.

Our unit is also registered with the renowned USFDA. As a result, we have been authorized to label our products with the prestigious CE mark.

EMPOWERING PEOPLE TO EXCEL :

We provide a professionally nurturant work environment that empowers employees to be self motivated, think out of the box, value excellence and bond with each other to perform as a team.

All across our corporation, our teams function with flexibility, speed and decisiveness of people in most challenging environment. We give tremendous freedom and opportunities to all our employees for superior work quality in competitive and ever changing and evolving business environment.

ANESTHESIA

A temporary state consisting of unconsciousness, loss of memory, lack of pain, and muscle relaxation. A patient under the effects of anesthesia is said to be anesthetized. Anesthesia enables the performance of other medical interventions.
ENDOTRACHEAL TUBE CUFFED GS-2004

FEATURES:
- Thermo sensitive tube softens at body temperature to conform to the anatomy of the respiratory tract.
- Kink resistant inflation tube ensures patient safety during cuff inflation and deflation.
- Murphy eye has a polished smoothness ensuring atraumatic intubation and extubation.
- Soft, high volume, low pressure cuff provides an air tight fit between tube and trachea.
- Radio opaque line.
- Standard 15mm connector.
- Conforms to F-29 standards.
- Sterile individually packed in peelable blister pack.
- Box of 10/ Master Box of 100.

ENDOTRACHEAL TUBE PLAIN GS-2002

FEATURES:
- Manufactured from thermosensitive material readily conforming to body contours at body temperature.
- Nasoral tip suitable for nasal/oral intubation.
- Radio-opaque line throughout the length to facilitate the exact location of the tube.
- Proximal end is fitted with standard 15 mm connector.
- Sterile individually packed, Box of 10/ Master Box of 200.

RESQ BAG GS-2050

FEATURES:
- Resq Bag kit consists of a Silicone Manual Resuscitator, Star Lumen Kink Resistant Oxygen Tubing, Reservoir Bag, Silicone Mask and Pressure Limiting Valve (PLV).
- Resuscitator and Mask made up from 100% silicone.
- Silicone Resuscitator provides bag re-expansion property.
- PLV allows crucial adjustments for enhanced performance.
- 360° swivel joint between Patient Valve and Mask ensures easy maneuverability to interface with patient’s posture.
- All connectors (15, 22mm) as per international standards.
- Box of 1/ Master Box of 8.

SILKO MASK GS-2049

• Autoclavable – suitable for repeated use.

REINFORCED ENDOTRACHEAL TUBE GS-2013

FEATURES:
- Flexo-metallic Endotracheal Tube for airway management intended for use in surgeries demanding flexible head or neck position.
- Specially designed, suitable to laryngeal-tracheal anatomy.
- Flexo-metallic feature provides 100% kink resistance and anti crushing strength to the Endo Tracheal Tube.
- High volume, low pressure cuff provides effective seal between tube and trachea & minimizes the risk of folds.
- Radio opaque line with precise graduation marking ensures proper placement of the tube.
- Murphy eye ensures clear airway and no mucus blockage.
- Sterile, Individually packed.
- Box of 5/ Master Box of 100.

TRACHEOSTOMY TUBE GS-2010/ 2008

FEATURES:
- Made of thermosensitive material which softens at body temperature to accommodate individual patient anatomy.
- Soft flexible flange helps easy fixation.
- 15 mm connector, rotatable in 360° direction.
- Radio opaque blue line for X-ray visualization.

TRACHEOSTOMY TUBE CUFFED GS-2010
- Soft cuff mainly adjusts the pressure at contact point during the breathing cycle minimizes the risk of tracheal trauma.
- Pilot balloon with non return valve facilitates the cuff inflation and deflation.

TRACHEOSTOMY TUBE PLAIN GS-2008
Light weight, non irritant ensures zero inflammation.

BAIN CIRCUIT SH-2088

FEATURES:
- Bain circuit is a co-axial modification of the basic T-piece system, developed to facilitate scavenging of waste anesthetic gases.
- Bain circuit is available with 22mm corrugated tube with expiratory valve & 2 litre airstatic bag.
- Sterile and individually packed.
- Box of 1/ Master Box of 20.

CATHETER MOUNT SH-2040

FEATURES:
- Double swivel elbow connector with suction port and cap provides better flexibility, easy accessibility and provide comfort to patient during suction.
- 15 mm I.D./22 mm O.D. connector fits all tracheal tubes.
- 22 mm standard female connector is compatible with all breathing and ventilator circuits.
- Specially designed port at the elbow facilitates suction and gas sampling without disconnecting the breathing circuit.
- Collapsible corrugated tubing is inert to all anaesthetic gases and reagents.
- Individually packed in poly bag.
- Box of 20/ Master Box of 200.

LARYNGEAL MASK EXCELL GS-2032

FEATURES:
- An airway used for routine and elective surgical procedures.
- Made up of poly vinyl chloride (PVC).
- Anatomically engineered mask provided with separate inflation line.
- Disposable airway provided with 15 mm standard connector.
- Pilot balloon for easy inflation and deflation of cuff.
- Supplied sterile individually packed in blister pack lid for convenience.
- Box of 10/ Master Box of 50.

GS-2010
GS-2008
GS-2032
SUCTION CATHETER GS-2006/ 2007 TC

FEATURES:
- Oro-bronchial catheter.
- Provided with funnel shape connector for safe connection to the suction equipment.
- Distal end is open with one lateral eye to avoid trauma during suction of oro-bronchial secretion.
- Frozen surface tubing for smooth intubation.
- Colour coded for instant size identification.
- Sterile, Box of 100/ Master box of 1000.

CEE TEE CATH TC GS-2007 TC
- Made up of extra soft plasticizers. Provided with two lateral eyes and thumb control facility for efficient suction control.

Size Chart
| GS-2006  | 6, 8, 10, 12, 14, 16, 18 FG |
| GS-2007 TC | 6, 8, 10, 12, 14, 16 FG |
| Length | 53 cm |

GELATO GS-2025 P

FEATURES:
- Endo Bronchial Suction Catheter with a non-traumatic Tip.
- Manufactured from non-toxic medical grade PVC.
- Integrated ring type (Open End) Flower shaped tip to minimize any mucosal damage.
- The catheter is automatically centered during suctioning due to its integral ring type design. This prevents irritation to the tracheal mucosa and adds to patient comfort.
- Two round lateral eyes facilitate efficient suctioning.
- Sterile, individually packed in a peel open soft blister pack.
- Box of 100/ Master Box of 1000.

GELATO TC GS-2025 TC
- Thumb control facility for efficient suction control.

Size Chart
| Sizes | 6, 8, 10, 12, 14, 16 FG |
| Length | 53 cm |

GUEDEL AIRWAYS GS-2012

FEATURES:
- Guedel Airways are designed to maintain an unobstructed oropharyngeal airway during or following general anaesthesia and in patients who are unconscious for other reasons.
- Integral hard bite block avoids airway occlusion and biting of tongue.
- Stepless airway path for easy cleaning.
- Bite blocks are colour coded for instant size identification.
- Manufactured from non-toxic, non-irritant polymer PE.
- Individually packed in peelable soft blister pack.
- Sterile, ready for use.
- Box of 50/ Master Box of 400.

| Sizes | 000, 00, 0, 1, 2, 3, 4 |

CENTRO GS-3042

FEATURES:
- Manufactured from bio-compatible PU material.
- Based upon much preferred Seldinger technique.
- Radio-opaque soft tip catheter with clear markings facilitates correct placement.
- Guidewire with soft J-tip avoids perforation and provides good torque to ensure firm insertion.

CENTRO GS-3042

EPI KIT SFT GS-2106

FEATURES:
- Specially designed epidural anaesthesia kit.
- Sterile, Box of 1/ Master Box of 50.

KIT CONSISTS OF:
- EPIDURAL CATHETER: Closed, soft tip with 3 lateral eyes.
- EPIDURAL NEEDLE: Tuohy type needle is soft and provided with clear depth marking for accurate insertion.
- LOR SYRINGE: Specially designed syringe is provided for clear identification of epidural space.
- THREADING ASSIST GUIDE: Fit securely into the needle and assist easy advancement of catheter.
- DETACHABLE CONNECTOR: Separate twist lock connector is provided for safe attachment to the catheter.
- HYDROPHOBIC FILTER: Hydrophobic 0.2 µ filter is provided for additional safety against microbial infections.

EPI CATH SFT GS-2104
- Spare catheter for epidural anaesthesia.
- Sizes available 16 & 18 NG. Box of 10/ Master Box of 400.

SPINAL NEEDLE GS-2029

FEATURES:
- Specially designed to administer lumbar/ subarachnoid anaesthesia.
- Sharp bevel design for low puncture force ensures minimal puncture trauma.
- Transparent hub provides rapid detection of CSF flashback for confirming accurate placement.
- Snugly fit stylet into the respective needle facilitates no tissue coring.
- Fine gauze needle design greatly reduced the risk of PDPH (Post Dura Puncture Headache).
- Colour coded stylet enables rapid size identification.
- Sterile, individually packed in peelable pouch.
- Box of 50/ Master Box of 1000.

Size Chart
| Sizes  | 20, 21, 22, 23, 24, 25, 26, 27 G |

NASOPHARYNGEAL AIRWAY GS-2034

FEATURES:
- Suitable for suctioning in I.C.U.s & provide an alternative way when oropharyngeal airway is occluded.
- Made of Medical Grade PVC readily conforms to the nasopharyngeal anatomy.
- Thin wall construction provides maximum inner diameter.
- Interior walls with channel grooves, facilitate easy insertion of catheter.
- Specially designed bevel tip reduces mucosal trauma during insertion.
- Individually packed in peelable pack.
- Sterile ready for use.
- Box of 25/ Master Box of 250.

Size Chart
| Sizes  | 6.5, 7.0, 7.5, 8.0, 8.5 mm |

OXY SET SH-2016

FEATURES:
- Manufactured from soft, non-toxic PVC thus non irritating even in long term use.
- System of attachment provides maximum freedom to the patient and leaves the patient’s mouth free for nutrition and communication.
- Twin bore/ nasal tips are designed to ensure equal volume of oxygen to both air passages.
- Soft funnel shape connector facilitates easy connection to the oxygen source.
- Multichannel tube ensures the supply of oxygen even if the tube kinks accidentally.
- Non-sterile, individually packed in poly bag.
- Box of 20/ Master Box of 200.

**FLEXI MASK SH-2020**

**FEATURES :**
- Flexi Mask is designed for convenient oxygen therapy.
- Moulded face mask is manufactured from non-toxic, non-irritant medical grade PVC.
- Provided with adjustable elastic strap for proper positioning of mask on the nasal area.
- Swivel connector for convenience of attachment to the oxygen tube.
- Two meter multichannel tube is provided to ensure continuous flow of oxygen.
- Proximal end fitted with soft funnel shape connector for easy connection to oxygen source.
- Individually packed in poly bag.
- Box of 20/ Master Box of 200.

**HI MASK SH-2044**

**FEATURES :**
- Specially designed for High Concentration Oxygen Therapy.
- Equipped with soft, transparent and odour free Vinyl Mask for greater patient comfort.
- Non return valves provided at inhale and exhale points, prevent Carbon-dioxide retention.
- Light weight reservoir improves the oxygen efficiency.
- Individually packed in Box.
- Box of 1/ Master Box of 50.

**UNIT CONSIST OF :**
- Mask with Elastic Strap and Non Return Valve.
- Mask Connector with Non Return Valve.
- 600 ml Reservoir, 200 cm. long Multichannel Tube.

**OXY LOCK SH-2038**

**FEATURES :**
- Variable venturi system to ensure accurate concentrations of oxygen with single unit.
- Transparent air entrainment mask with soft anatomical form with easily adjustable elastic strap.
- Wide, adjustable strap for proper positioning of mask on the nasal area.
- Rotating type connector for patient’s comfort.
- Unique spring loaded mechanism locks prescribed concentration in place ensuring safety and correct oxygen concentrations.
- Two Meter multichannel tube is provided to ensure continuous flow of oxygen.
- Individually packed in polybag.

**AERO NEB SH-2086**

**FEATURES :**
- Soft clear Aerosol mask provided with wide adjustable strap for proper positioning on the nasal area.
- Rotating type connector for patient’s comfort.
- Large surface area provided by unique convex cone design, ensures maximum capillary action.
- Jet action aids in faster nebulization.
- Nebulizes 3 cc medicine within 10 minutes.
- Angular connection of nebulizer chamber with mask nebulizes the patient even in supine position, ensuring no wastage of costly medicines.
- Box of 10/ Master Box of 100.

**KIT CONSISTS OF :**
- Jet type large nebulizer chamber with Mask and 200 cm long multichannel tube.

**SURGERY**

An ancient medical specialty that uses operative manual and instrumental techniques on a patient to investigate and/ or treat a pathological condition such as disease or injury, to help improve bodily function or appearance or to repair unwanted ruptured areas.
**ROMO VAC SET GS-5002**

**FEATURES :**
- Close wound drainage device under negative pressure with option to use one or two catheters post-operatively.
- Multiperforated catheters provided with radio opaque line and satin smooth eyes for trauma free performance.
- Graduated bellow allows user to measure drainage volume.
- Different catheter sizes available to meet moderate to heavy drainage needs.
- Sterile, individually packed in a peelable pouch.
- Box of 1/ Master Box of 40.

**UNIT CONSIST OF :**
- Bellow unit capacity 800 ml.
- Connecting tube with clamp and “Y” connector.
- Curved needle with matching catheter.
- Spare perforated catheter.

**SIZE CHART :**

| Catheter Sizes | 10, 12, 14, 16, 18 FG |

**FLAT DRAIN SET GS-5047**

**FEATURES :**
- Manufactured from 100% silicone, latex free.
- Bellow unit:
  - In-built non-return valve prevents reflex of fluid.
  - Bellow provided with a convenient clip for secure hanging.
- Drain:
  - Enables easy placement & prevents accidental sliding out.
  - Radio opaque feature facilitates accurate placement.
  - 60cm long tubing for attachment to the Bellow unit.
  - Causes minimum trauma during removal.
  - Sterile, individually packed in a peel open soft blister pack.
  - Box of 1/ Master Box of 20.

**MINI VAC SET GS-5006**

**FEATURES :**
- Close wound drainage device under negative pressure.
- Radon drains have radio opaque line and burred free eyes for efficient trauma free performance.
- Easy to use by one person, depress the chamber to activate the suction of bellow unit.
- Sterile, individually packed in a peelable pouch.
- Box of 1/ Master Box of 50.

**UNIT CONSIST OF :**
- Bellow unit capacity 50 ml.
- Curved needle with matching catheter.

**SIZE CHART :**

| Catheter Size | 8 FG |

---

**ROMO ADK GS-5036**

**FEATURES :**
- Specially designed for post operative abdominal drainage.
- Soft and smooth catheter with large atraumatic eyes for efficient drainage.
- Radio-opaque line throughout its length help x-ray visualization.
- Specially designed foldable handle suitable for bed side hanging.
- Colour coded for instant size identification.
- Sterile, individually packed in a peelable pouch.
- Box of 10/ Master Box of 100.

**UNIT CONSIST OF :**
- Soft drainage catheter 50 cm long.
- Collection bag of 2000 ml capacity.

**SIZE CHART :**

| Catheter Sizes | 16, 20, 24, 28, 32 FG |
**VACCU SUCK SUCTION SET GS-5016 S/ 5016 C**

**FEATURES :**
- Moulded Yankaur suction handle with flexible kink resistant tube provides unobstructed suction during prolonged use.
- Soft flexible adaptors at both ends of the tube provide safe grip to the handle as well as suction source.
- Vent port is closed with tight fit sleeve, which can be removed by small incision to shift to vent control system.
- Sterile, individually packed in a peelable soft Blister pack.
- Box of 10/ Master Box of 100.

**SUMP SUCTION SET GS-5008**
- Specially designed pool suction handle is a versatile three position instrument that quickly converts from gentle sump action to pinpoint suction.

**CARDIO Thoracic**

In the field of medicine, Cardiothoracic surgery involves surgical treatment of diseases affecting organs inside the thorax. A cardiothoracic surgeon is qualified to operate on the heart, areas of the chest and in some cases, the lungs.
FLEXO CATH GS-5034

FEATURES:
- Thoracic drainage catheter manufactured from DEHP Free Material.
- Extra soft catheter is gentle to the body tissues and most suitable for thoracic drainage.
- Proximal end fitted with specially designed tapered tongue provides excellent forceps grip and non-traumatic insertion.
- Catheters are marked at every 2 cm from the last eye to ascertain the depth of placement.
- Sterile, double packed in peelable pouch pack.
- Box of 20/ Master Box of 400.

SNUGGER SET GS-5038

FEATURES:
- Specially designed for putting purse-string sutures during CABG surgery.
- Manufactured from medical grade, non toxic PVC.
- Available as a set of snare and six snuggers in three different colours i.e. Blue, Pink and Yellow.
- Sterile, individually double packed in a peelable pouch.
- Box of 25/ Master Box of 250.

FLEXO CATH ANGLED GS-5034 A

FEATURES:
- Specially designed right angled catheter for thoracic drainage from the deeper sites of pleural cavity.
- Manufactured from DEHP Free Material.
- Sterile, double packed in peelable pouch pack.
- Box of 10/ Master Box of 100.
- All other features are as Flexo Cath.

THORACIC TROCAR CATHETER GS-5030

FEATURES:
- Specially designed for quick non operative pleural and chest drainage.
- Flat handle facilitates easy maneuverability.
- Large smooth drainage eyes for efficient drainage.
- Markings provided at 5, 10, 15 & 20 cm. from the distal tip to help ascertain depth of penetration.
- Proximal end is fitted with tapered connector for easy connection to drainage bottle.
- Sterile, individually double packed in a peelable pouch.
- Box of 10/ Master Box of 100.
ROMO SEAL ADULT GS-5020

FEATURES:
- Under water seal drainage system.
- Double chamber compact unit has 2 litre capacity making it suitable for all cardiac and thoracic procedures.
- Easy to read markings help note the drainage volume.
- Clearly marked initial level ensures the under water seal.
- Suction port is provided for connection with suction unit.
- Kink resistant large bore tubing facilitates unrestricted flow.
- Unit is provided with metal hangers and floor stand.
- Box of 1/ Master Box of 10.

RESPIROMETER SH-6082

FEATURES:
- Breathing exerciser.
- Innovative system to exercise respiration through inspiration.
- Specially designed with 3 stage chambers to provide more efficient exercise to patient at a step up basis.
- Device is composed of Base and central part divided into three chambers containing three small spheres.
- Three spheres rise proportionately to the inspiration exerted by the user.
- Innovative design, can be dis-assembled into parts for cleaning and disinfection.
- Non sterile, individually packed in a box.
- Box of 1/ Master Box of 50.

UNIT CONSIST OF:
- Transparent main body, Base, Small sphere of Red, Yellow and Blue colour, Connecting tube with mouth piece.

UROLOGY

Also known as genitourinary surgery, is a specialised branch of medicine that focuses on the surgical and medical diagnosis or treatment of diseases pertaining to male and female urinary tract system and their reproductive organs.
NEL CATH GS-1004

FEATURES:
- Designed for short term bladder catheterization through urethra.
- Manufactured from Medical Grade PVC compatible with catheter lubricants.
- Frozen surface tubing for super smooth intubation.
- Coned distal end for atraumatic catheterization.
- Two lateral eyes for efficient drainage.
- Radio-opaque line provided throughout the length of catheter for X-ray visualization.
- Universal funnel shape connector for easy connection to urine bag.
- Sterile, ready for use.
- Box of 100/ Master Box of 1000.

MALE CATH GS-1010

FEATURES:
- Penile Sheath/ External Catheter.
- Male Cath is specially designed for urine incontinence for day and night use in male patients.
- Manufactured from 100% latex for soft and gentle feel.
- Provided with soft adhesive coated strip for proper fixing on the penis.
- Proximal end is designed for safe and easy connection to urine bag/ leg bag.
- Individually packed in peelable soft blister pack.
- Sterile, ready for use.
- Box of 50/ Master Box of 1000.

URO CATH GS-1072/ GS-1090/ GS-1094

FEATURES:
- Made up of latex bonded with silicone elastomer to eliminate the risk of encrustation.
- Symmetrical large capacity balloon ensuring a straight tip for proper flow and good sphincter action thus preventing bladder leakage.
- Coned distal end provided with burr free eyes for atraumatic intubation.
- Hard valve ensures easy inflation and deflation of balloon.
- Sterile, colour coded for instant size identification.

SILKO CATH GS-1078

FEATURES:
- Made of 100% Silicone elastomer, able for prolonged use.
- Clear material enables visualization of drainage flow.
- Bio-compatible material reduces irritation for patient’s comfort and safety.
- The eyes are smooth and proportional to provide atraumatic insertion.
- Hard valve ensures easy inflation and deflation of balloon.
- Sterile, individually packed. Colour coded as per size.
- Box of 10/ Master Box of 500.

URO BAG (ROMO 10) DB-1070-10

FEATURES:
- Two litre capacity bag provided with 100 cm long super smooth kink resistant tubing ensures unrestricted flow.
- Moulded handle facilitates easy handling of bag and holds the tube in upright position to prevent kinking.
- Efficient non-return valve with top outlet.
- Modified tapered connector facilitates aseptic catheter-urine bag connection.

URO BAG (ROMO 30) DB-1070-30
URO BAG (ROMO 150) DB-1070-150

- Large bore kink resistant extra soft tube is easy to milk and ensures unrestricted flow. All other features are as above.
- Box of 25/ Master Box of 200.

URO FLOW DB-1053

FEATURES:
- Specially designed Urovision chamber for instant visualization of drops and flow rate monitoring.
- Urovision chamber facilitates quick visualization of urine color to detect presence of blood, pus cells etc.
- Non return valve prevents back flow of urine to the patient, which ensures prevention of any upward infection.
- Universal tapered connector with sampling port, helps in withdrawal of the urine sample without opening it, thus, maintains a “closed system”.
- “T” type bottom outlet ensures easy emptying.
- A complete closed urine drainage system as per the NABH guidelines.
- Box of 10/ Master Box of 80.

Size Chart

UROMETER DB-1068

FEATURES:
- Specially designed for measuring hourly urine output.
- Clear measured volume chamber allows accurate reading.
- Urine Meter directly attached to two litre capacity Urine Bag with overflow facility.
- Fully Closed circuit eliminates the risk of contamination.
- Universal tapered connector facilitates aseptic catheter and urine bag connection.
- Foldable hanger with tube holder for bed side hanging.
- Sterile, individually packed. Box of 5/ Master Box of 50.

UROMETER PLUS DB-1068 N

- Universal tapered connector with sampling port facilitates mid stream urine sampling. Other features are as above.
- Box of 1/ Master Box of 50.

TUR SET GS-1008

FEATURES:
- “Y” shaped set for Endoscopic irrigation during Trans Urethral Resection of Prostate Gland.
- Manufactured from non-toxic, non-irritant medical grade PVC.
- Thumb operated clamps, helps quick and smooth change of bottles.
- Proximal end fitted with flexible latex tubing for easy connection to Endoscope.
- Sterile, individually packed in peelable pouch pack.
- Box of 10/ Master Box of 100.
SUPRA CATH PLUS GS-1006 S

FEATURES:
• Designed for cystostomy and supra-pubic drainage.
• Manufactured from 100% silicone.
• Symmetrical inflated balloon provided for self retention.
• Radio-opaque line throughout its length for x-ray visualization.
• One lateral eye at distal end for efficient drainage.
• Sterile, individually packed in box.
• Box of 1/ Master Box of 20.

FOLEY TRAC GS-1026

FEATURES:
• Silicone elastomer coated Soft feel Foley Balloon Catheter.
• Efficient, hard plastic, non return valve facilitates quick and hassle-free inflation and deflation.
• Sturdy and properly coned soft closed tip enables easy penetration.
• Large, laterally placed drainage eyelets enable efficient, trouble-free drainage.
• Highly elastic drainage funnel, grips the tapered connector of the urine bag & prevents any accidental disconnection.
• Non return valve has the standard size color coded sleeve for instant recognition of size.
• Sterile, individually packed in box.
• Box of 50/ Master Box of 500.

TRANSFUSION

Infusion/ Transfusion therapy involves the administration of medication, nutrition products for parenteral feeding or other fluids through a needle or catheter or blood products through specialized blood administration sets respectively.
VEIN CATH GS-3024

FEATURES:
- Premium I.V. cannula with new improved features.
- “Instant flashback indicator” feature ensures quick and secure cannula placement.
- Manufactured from fully automated CAD/CAM process.
- Specially designed transparent needle holder for clear and precise vision.
- Radio-opaque stripes run throughout the length for X-ray visualization.
- I.V. cannula has color coded injection port which helps in identification of the size.
- Sterile, individually packed in blister pack.
- Box of 50/ Master Box of 1000.

Size Chart
- Vein Cath 18, 20, 22 G

INTRAFLON GS-3028

FEATURES:
- I.V. Cannula provided with injection port and non return valve for additional medication.
- Manufactured from fully automated CAD/CAM process.
- Kink resistant FEP-Teflon cannula has extremely smooth inner and outer surface to ensure smooth flow.
- 3 radio-opaque stripes cannula for X-Ray visualisation.
- Double tapered moulded cannula tip ensures smooth and less traumatic cannulation.
- Super sharp Japanese triple facette beveled needle is designed with two cutting edges for smooth penetration.
- Transparent flashback chamber allows immediate detection of blood.
- Sterile, Colour coded for instant size identification.
- Box of 100/ Master Box of 1000.

Size Chart
- Intra Cath -2 14, 16, 18, 20, 22, 24 G

NEO CATH/ MICRON GS-3030/ 3031

FEATURES:
- Specially designed paediatric I.V Cannula range, for peripheral intravenous infusion.
- I.V. Cannula without injection port.
- Main body is specially designed with projection for low point gap to facilitate better manoeuvring.
- Box of 100/ Master Box of 2000.

NEO CATH GS-3030
- Neo-natal I.V Cannula manufactured from fully automated CAD/CAM process.

MICRON GS-3031
- Infant I.V Cannula.
- Specially designed clips provided for better manoeuvring.

Size Chart
- Neo Cath 24, 25 G
- Micron 26 G

INTRA CATH - 2/ TRIFLON GS-3022/ 3006

FEATURES:
- I.V. Cannula with injection port.
- Manufactured from fully automated CAD/CAM process.
- Sterile, individually packed in blister pack with tyvek lid.
- Box of 100/ Master box of 2000.

TRIFLON GS-3006
- I.V. cannula with integrated 3-way stop cock facilitates simultaneous infusion of fluids or additional medication.
- Rigid and sturdy design with flexible wings for convenient manoeuvring.
- Colour coded tap to identify the desired direction of flow.
- Box of 50/ Master Box of 1000.

Size Chart
- Intraflon 18, 20, 22, 24 G
- Triflon 18, 20, 22 G
**RMS INFUSION SET SS-3062**

**FEATURES :**
- Sharp piercing spike for easy insertion in I.V. container.
- Specially designed Cylindrical collapsible drip chamber to visualize the flow rate.
- Provided with disc type fluid filter to filter any particulate matters in the I.V. fluid.
- 150 cm long super smooth kink resistant tubing with efficient roller controller for accurate and unrestricted flow.
- Flash ball type injection port for extra medication.
- Infusion set with drop rate of 20 drops/ml.
- Sterile, Pack of 25/ Master Box of 500.

**RMS VENTED INFUSION SET SS-3060**

- Infusion set with built in air vent and bacteria barrier hydrophobic filter. All other features are as above.

**TRANSFLOW SS-3063**

- Specially designed vented infusion set with latex free “Y” injection site along with needle-prick protection shield.

**STERIFLO SS-3077**

**FEATURES :**
- Premium Infusion set with new features, improved quality.
- Sharp piercing spike for easy insertion in I.V. container.
- Specially designed vented infusion set with 1.2 micron air vent filter to ensure entry of air without contamination.
- Drip chamber is manufactured from DEHP free material to ensure higher safety standards.
- Disc type fluid filter prevents entry of any particulate matter in the fluid.
- DEHP free super smooth kink resistant tubing with efficient roller controller for unrestricted flow.
- “Y” injection port is provided for additional medication.
- New advanced rotating luer lock with cap for secure connection to the cannula.
- Compatible with all infusion pumps.
- Sterile and individually packed.
- Box of 10/ Master Box of 200.

**INTRAFLOW AS SS-3061 AS**

**FEATURES :**
- DEHP Free Safety Infusion set.
- Clear, glassy vented spike fits tightly on all container types, ensuring easy insertion and removal.
- Larger and longer drip chamber to fit firmly in the hands, with unique center ring which ensures gripping.
- Soft, see-through clear DEHP free PVC tubing.
- Advance, handy roller clamp for efficient control.
- An innovative, hydrophilic filter membrane ensuring Air Stop safety in case of emptied fluid container. Maintains the tubing completely filled with fluid.
- Provided with a protective cap lined with a hydrophobic membrane placed on the Luer Lock fitting, stops fluid leaking and protects against contamination. This prime stop automates priming and ends messy dripping.
- “Y” injection Port for extra medication.
- Compatible with all infusion pumps.
- Box of 10/ Master Box of 200.

**MICROPERF SS-3064**

**FEATURES :**
- Micro drip infusion set with drop size reduced to 60 drops per ml.
- Sharp piercing spike for easy insertion in I.V. container with built in bacterial air vent.
- Cylindrical collapsible drip chamber to visualize the flow rate.
- Disc type fluid filter to filter any particulate matter in the I.V. fluid.
- 150 cm long super smooth kink resistant tubing with efficient roller controller for accurate and unrestricted flow.
- “Y” injection port for extra medication.
- Luer lock connector.
- Sterile and individually ribbon packed.
- Pack of 25/ Master Box of 500.
MICROGUARD SS-3067
FEATURES:
- Especially designed vented infusion set for oncology (chemotherapy), critical care, neonatal & paediatrics.
- Manufactured from DEHP free material which ensures higher safety standards.
- Needle-free “Y”-injection site prevents finger injury & accidental tube puncturing.
- 0.2 micron filter is capable of filtering all microbes.
- 0.2 micron filter is capable of removing any entrapped air in the infusion set & thus is a SAFEGUARD from air-embolism hazard.
- Luer lock connector.
- Compatible with all infusion pumps.
- Sterile and individually blister packed in box.
- Box of 1/ Master Box of 100.

PEDIA DRIP/ PLUS SS-3058/ 3057
FEATURES:
- Specially designed DEHP Free measured volume sets.
- Box of 10/ Master Box of 100. Sterile, individually packed.

PEDA DRIP SS-3058
- Manufactured from acrylic material.
- Burette type chamber of 100 ml with 10 ml overflow limit.
- Micro drip with drop size of 60 drops per ml.
- Burette chamber is made of bio-compatible medical grade transparent polymer, suitable for infusing all types of fluids.
- Patent design hanger facilitates hanging on the I.V. stand.
- Floating auto shut off valve acts as floating indicator and automatically shut off the drain path when the chamber gets empty to prevent any air trapping into the fluid line on entering patient’s venous system.
- Micro dropper of 60 drops per ml.
- Sharp piercing spike provided with built in air inlet containing bacteria barrier filter.
- Separate plugs for extra medication and change over.
- No-kink device prevents kinking of tube during transport.
- Sterile, individually packed in blister pack.
- Box of 10/ Master Box of 100.

PEDIA DRIP PLUS SS-3057
- 100% latex free set provided with Y-injection site. All other features as above.

BURETTA SS-3068
FEATURES:
- Specially designed DEHP Free measured volume set with large calibrated burette chamber of 150 ml.
- Manufactured from USP class VI approved flexible cellulose propionate.
- Easy to read scale with white contrast background.
- Floating auto shut off valve acts as floating indicator and automatically shut off the drain path when the chamber gets empty to prevent any air trapping into the fluid line on entering patient’s venous system.
- Micro dropper of 60 drops per ml.
- Sharp piercing spike provided with built in air inlet containing bacteria barrier filter.
- Separate plugs for extra medication and change over.
- Roller type flow controller provides accurate flow control.
- “Y” injection site for extra medication.
- No-kink device prevents kinking of tube during transport.
- Sterile, individually packed in blister pack.
- Box of 10/ Master Box of 100.

RMS BLOOD ADMINISTRATION SET SS-3052
FEATURES:
- Conforms to ISO 1135-4 standard.
- Cylindrical drip chamber provided with 200 micron filter to prevent passage of any clot into the chamber.
- Sharp non-vented spike suitable for blood bags and all type of standard blood containers.
- Flash ball type injection port for extra medication.
- 150 cm kink resistant tube.
- Efficient roller controller for accurate adjustment of infusion rate.
- Sterile, individually packed.
- Box of 25/ Master Box of 500.

VENTRA FIX SS-3051
- Specially designed DEHP Free vented blood transfusion set with latex free “Y” injection site.
- Sterile, individually blister packed.
- Box of 10/ Master Box of 100.
**KWIC FUSOR GS-6021**

**FEATURES:**
- Heavy duty pressure cuff specially designed for quick infusion/ fluid container setup and replacement.
- Robust pressure cuff facilitates fast fluid transfer suitable to patient’s indication and para-medics satisfaction.
- Suitable for pressure up to 400mm of Hg.
- Clear material enhances visibility of the fluid transfer/flow.
- Easy to use, hook-and-loop fastener enables easy replacement of Infusion bag without removal of Pressure Cuff from drip stand.
- Instant venting through the three way stop cock enables quick deflation of the cuff.
- Clear and precise pressure gauge facilitates rapid and reliable pressure control.
- Squeeze bulb is supple, easier to operate for fast inflation.
- Box of 1/ Master Box of 20.

**Size Chart**

| Capacity | 500, 1000 ml |

---

**ROMO FLOW SS-3070**

**FEATURES:**
- DEHP Free I.V set specially designed for controlling the flow rate of fluid.
- Eliminates the need of expensive electronic I.V. pumps.
- Gentle gravity drive is self correcting.
- Wide dial operates as thumb wheel like roller clamp.
- Security door provided to prevent the accidental change of flow rate.
- Low cost disposable set provides maximum safety, traditional grip, shape and feel of old roller clamp.
- Sterile, individually packed in blister pack.
- Box of 10/ Master Box of 100.

---

**C.V.P MANOMETER GS-3008**

**FEATURES:**
- Suitable for continuous or intermittent, monitoring of central venous pressure during infusion particularly in ICU, CCU, OT’s and casualty departments.
- Manometer tube with graduation from −4 cm to +34 cm and attached to three way tap.
- 120 cm. long extention tube is fitted with female luer lock on one end and male luer lock on the other end for safe connection to central venous catheter.
- Latex free rubber flash ball type injection port is provided for extra medication.
- Sliding indicator provided to record previous reading.
- Moulded clamps with latex free rubber strings are provided for easy fixation on the I.V. stand.
- Sterile, individually packed in peelable pouch.
- Box of 1/ Master Box of 50.

---

**EXTEENA UNO/DUO/TRIO GS-3048U/3048D/3048T**

**FEATURES:**
- Needle free devices prevent thrombotic occlusion in I.V line and inhibit microbial colonization.
- Secure fitment to I.V Cannula, I.V Set & Extension Lines.
- Closed system controls infection and air embolism.
- Swabable port prevents infection, allows safe access.
- Box of 20/ Master Box of 400.

**EXTEENA UNO GS-3048 U**
- Needle free I.V connector line at one end and rotating luer lock at the other end.

**EXTEENA DUO GS-3048 D**
- Needle free I.V access device with two needle free luer lock ports at one end and rotating luer lock at other end.
- "Y" Type, length is 15 cm.

**EXTEENA TRIO GS-3048 T**
- Needle free I.V access device with tri-extension line at one end and rotating luer lock at other end.
**BI VALVE GS-3040**

**FEATURES:**
- Specially designed lipid resistant three way Stop Cock suitable for use during pressure infusion and invasive Blood pressure monitoring.
- Manufactured from medical grade, Clear transparent polycarbonate.
- Three arm handle is easy to operate.
- Minimum residual volume, rigid construction with circular flowchannel prevents the incidence of air-trap.
- Provided with two female luer lock ports and one male luer lock port with rotating lock, for safe connection to other device.
- Sterile, individually packed in Blister pack.
- Box of 50/ Master Box of 1000.

**PM -O-LINE GS-3036**

**FEATURES:**
- Small bore high pressure extension line.
- Suitable for high pressure monitoring and for connection between syringe infusion pump and patient.
- Provided with male luer lock at one end and female luer lock at other end and fits all standard equipment.
- Luer lock connectors provide secure fitting.
- Sterile, individually packed in Blister pack.
- Box of 50/ Master Box of 600.

**VEIN -O-LINE GS-3034**

**FEATURES:**
- Low pressure large bore extension line.
- Provided with male luer lock at one end and 3-way stop cock at other end enabling the user to run two lines simultaneously.
- Luer lock connector provide secure fitting.
- Manufactured from medical grade PVC.
- Sterile, individually packed in Blister pack.
- 10 cm : Box of 50/ Master box of 1000.
- Other sizes : Box of 20/ Master Box of 400.

**HI LINE GS-3037**

**FEATURES:**
- Polyethylene, DEHP free material, pressure monitoring extension line.
- Non reactive and compatible to all commonly infused fluids.
- Small bore high pressure extension line suitable for high pressure applications, for example as connection between syringe, infusion pump and the patient.
- Provided with male and female luer lock at either ends, which facilitates secure fitting to all standard equipment.
- Sterile, individually packed in peel open soft blister pack.
- Box of 20/ Master Box of 400.
HI LINE SPIRAL GS-3037 S

FEATURES:
- Polyethylene, DEHP free material, pressure monitoring extension line.
- Non reactive and compatible to all commonly infused fluids.
- Specially designed spiral type extension line for greater patient comfort and freedom of movement.
- It expands and contracts gently with patient movement and protects the patient, cannula, infusion equipment from accidental damage.
- All other features are as that of Hi line.
- Sterile, individually packed in peel open soft blister pack.
- Box of 20/ Master Box of 400.

SCALP VEIN SET GS-3004

FEATURES:
- Short beveled siliconised needle facilitates atraumatic cannulation.
- Thin wall needle provides better flow rate per gauge.
- Butterfly shaped wings facilitates easy handling and attachment with the skin.
- Butterflies are colour coded for instant identification of needle size.
- The proximal end of the set is provided with flexible female luer fitting.
- Butterfly connected to soft non-toxic, non-irritant tube which does not kink or coil.
- Sterile, individually packed in blister pack.
- Box of 100/ Master Box of 4000.

GASTROENTEROLOGY

This branch of medicine focuses on the human digestive system and its disorders. Disease affecting the gastrointestinal tract, which include the organs from mouth to anus, along the alimentary canal, are the focus of this specialty.
**ROMOLENE GS-4032**

**FEATURES:**
- Nasogastric tube. Distal end is coned with radio opaque material for easy intubation.
- Four lateral eyes are provided for efficient aspiration and administration.
- Super smooth, low friction, frozen surface facilitates atraumatic intubation.
- The tube is marked at 50, 60 & 70 cm from the tip for accurate placement.
- Specially designed dual port connector.
- Radio-opaque line for X-ray visualization.
- Colour coded for instant size identification.
- Sterile, Individually packed in peelable soft blister pack.
- Box of 50/ Master Box of 600.

**FEEDY GS-4038**

**FEATURES:**
- DEHP Free Infant feeding tube with graduation.
- Made from non toxic PVC, non irritant to delicate mucosa.
- The tube is marked at every cm. from the tip starting from 5cm to 40cm for accurate placement.
- Distal end is coned with two lateral eyes and proximal end is provided with female luer mount for easy connection to feeding funnel or syringe.
- Low friction, frozen surface facilitates atraumatic intubation.
- Radio-opaque line facilitates accurate location.
- Sterile, Straight packed in peelable soft blister pack.
- Box of 100/ Master Box of 2000.

**FEE BAG GS-4042**

**FEATURES:**
- Specially designed DEHP Free 1.2 Lit. capacity bag for feeding purpose.
- An ice pouch is provided with the bag for preserving the food for longer period.
- A transfer set is directly connected to the bag for easy feeding.
- Roller controller is provided to control the flow at which food is going to the patient.
- A hanger is provided with bag for easy hanging.
- Sterile, individually packed in peelable pouch.
- Box of 5/ Master Box of 50.

**GASTROLENE GS-4024**

**FEATURES:**
- Polyurethane feeding tube.
- Tube is completely inert and non-reactive to gastric juices.
- Suitable for long term usage of up to 4 weeks.
- Provided with dual port mount connector for safe connection with irrigation mount or luer fitment of syringe.
- Four lateral eyes for efficient enteral feeding & aspiration.
- Specially designed dual port connector.
- The tube is marked at 50,60 and 70 cm from the tip for accurate placement.
- Yellow radio opaque line for X-ray visualization.
- Tip is radio opaque and color coded for immediate size identification.
- Sterile, Box of 10/ Master Box of 100.
